***“Working to benefit people and wildlife.”***

Through experience gained working with developers, Non-Governmental Organisations (NGOs), Local Authority and Statutory Nature Conservation Organisations (SNCOs), Caledonian Conservation Ltd is able to identify the optimal and most cost effective approach to any site. Based in Hamilton, we provide a full range of ecological services throughout the UK. Project examples include onshore wind energy developments, power lines, roads, rail, housing, conservation research and public interpretation.

An overview of our services is provided below:

- Birds (including all Schedule 1 licensed species)
- Bats (including licensed works & ropes works)
- Protected mammals (eg otter, badger, water vole)
- Reptiles & amphibians (including great crested newt)
- Invertebrates (terrestrial & freshwater)
- Botanical & habitat surveys (Phase 1 & NVC)
- Feasibility studies & ecological constraints reports
- Full Ecological Impact Assessment (EclA)
- Habitat Management & Monitoring Plans (HMMPs)
- Ecological Clerk of Works (ECOW)
- Species Protection Plans & mitigation design
- Stakeholder consultation
- ArcGIS mapping & analysis
- Training
- Public interpretation & photography

Please feel free to contact us directly to discuss any specific projects.
